

# Supporting ADHD at Oasis Academy Arena

**Attention deficit hyperactivity disorder (ADHD) is a condition that affects people's behaviour. People with ADHD can seem restless, may have trouble concentrating and may act on impulse.**

When a student is diagnosed with ADHD we work collaboratively with parents / carers, CAMHS and the EP to look at strategies for supporting students at school.

We then use the following to support the student at school:

- In class support
- Concentration skills group
- Mentoring
- Fiddle toys
- Movement breaks
